PROFESSIONAL EXPERIENCE

Visual and Experience Designer with **3+ years** of industry experience, delivering user-centric solutions across B2B, B2C, and B2B2C products. I've worked on **10+ digital products** across fintech, e-commerce, healthcare, travel, and AI-driven platforms, translating complex business and user requirements into clear, engaging, and scalable design solutions.

WORK EXPERIENCE (3+ YEARS)

CODESTAX.AI
Full Time • Chennai, India

Jan 2023 - Present

- Delivered 10+ B2B, B2C, and B2B2C digital products across fintech, e-commerce, healthcare, and travel sectors—owning user flows, wireframes, UI systems, and component-level execution across platforms.
- Led the **full design cycle** for a **luxury travel booking platform** and designed 3 unique concepts (luxury, earthy, and minimal), each tailored for different user personas. Co-created a seamless booking engine and the “Surprise Me” feature—mapping user preferences to hotel categories—boosting discovery interaction rate and improving engagement across 60+ premium hotels.
- Contributed to Myanmar’s largest e-commerce app**, designing flash sale modules, merchant onboarding, and fulfilment flows—enhancing product discoverability and improving **user retention across 8M+ customers**.
- Redesigned e-pharmacy and teleconsultation experiences** with intuitive UI; Improved navigation and reduced bounce rate by optimizing product categorization in a **B2B2C fabric commerce platform**.
- Defined UI/UX for a B2B2C **fabric commerce** platform enabling both wholesale and retail users. Worked closely with product managers to align material categorization and pricing tiers with merchant workflows, improving catalog navigation and reducing bounce rate on PDPs.
- Designed **AI-powered tools** that enhanced brand building, business strategy, HR management, and customer support (help bots)—delivering measurable impact through automation, personalization, and improved user engagement.
- Led **end-to-end design** of wallet apps, dashboards, and admin portals for banking (Video & Retail Banking and Performance Leaderboards), healthcare, microfinance, and government-backed platforms (CSR and public service projects)—driving complex workflows such as survey logic, user role management, security configurations, and advanced reporting.
- Advocated for **component reusability and design consistency**, contributed to collaborative design systems, and worked cross-functionally with engineers and PMs in Agile/Scrum environments.

STEAM TROOPS INNOVATION LABS
Intern • Chennai, India

Mar 2022 – May 2022

- Designed and validated responsive UI for a content aggregator platform MVP for mobile. Led UI development for post creation, feed layout, content interaction, and promoted business modules.
- Collaborated with developers to ensure accurate implementation and usability across key flows. Supported internal task planning and sprint deliverables.
